National University,
Bangladesh

B.Sc. in Physics
2023 – Present (3rd Year)

SKILLS

- Next.js
- React
- JavaScript
- HTML5
- CSS3
- Tailwind CSS
- MongoDB
- GitHub

ABOUT

Frontend Developer with hands-on experience in React, Next.js, and Tailwind CSS, focused on building fast, accessible, and maintainable web applications. Skilled at translating complex requirements into clean, user-friendly interfaces — with a sharp eye for performance optimization and code quality.

PROJECTS

KeenKeeper — Keep Your Friendships Alive

Built a full-featured friendship management web app that helps users maintain intentional relationships through interaction logging, relationship goal-setting, and a visual analytics dashboard. Features timeline-based history and a responsive UI built for seamless cross-device experience.

Digital Tools Buying Website

Developed a responsive e-commerce interface for digital tools with dynamic cart management, real-time total calculation, and a smooth checkout flow with toast notification feedback. Focused on clean state management and polished UI.

GitHub Issue Tracker

Built an API-driven GitHub issue tracker with tab-based filtering (All / Open / Closed), dynamic card rendering from JSON responses, modal detail views, and live search — complete with a loading spinner for async feedback. Demonstrates strong API integration and DOM state management.

EXPERIENCE

Currently seeking first professional role. Demonstrated real-world skills through self-initiated projects covering full-stack concepts, API integration, and production-grade UI development.
